

NIDA JASMIN KP

PYTHON FULL-STACK DEVELOPER

Malappuram,Kerala|+919746478783 | nidajasmin08@gmail.com | [Linkedin](#)

PROFILE

A highly motivated Python Full Stack Developer with a sharp eye for detail and a solid background in creating dynamic web applications. Experienced in backend development using **Python** and **Django**, and well-versed in front-end technologies including **React**, **HTML**, **CSS**, **JavaScript**, and **Bootstrap**. Always eager to learn new concepts and contribute strong analytical and problem-solving abilities within team-oriented environments.

WORK EXPERIENCE

PythonFull-Stack Intern,WebEaz technology

2025

- Developed and maintained web applications using **Python**, **Django**, and **PostgreSQL** for backend development.
- Built responsive user interfaces with **React.js**, **Tailwind CSS**, and **Bootstrap**.
- Designed and optimized RESTful APIs for smooth frontend–backend communication.
- Worked with **AWS** services for deployment, hosting, and scalability of applications.
- Collaborated on **AI/ML** projects, integrating machine learning models into real-world applications.
- Gained hands-on experience in database design, query optimization, and schema management.
- Participated in code reviews, debugging, and performance tuning to improve application efficiency.

PythonFull-Stack Intern ,Luminar Technolab

2024

- Developed and maintained web applications using **Python** and **Django** for backend functionalities.
- Integrated databases like **MySQL** for user data management.
- Built responsive, user-friendly UIs using **HTML**, **CSS**, **Bootstrap**, and **JavaScript**.
- Debugged and resolved issues in both frontend and backend development.

EDUCATION

Bachelor of Computer Application (BCA)
University of Calicut

2021 - 2024

Higher Secondary
Govt Model HSS, Calicut University

2019 - 2021

SSLC
Govt Model HSS, Calicut University

2018 - 2019

TECHNICAL SKILL

- | | | | |
|----------------|--------------|-------------|--------------|
| ▪ Python | ▪ Django | ▪ React | ▪ PostgreSQL |
| ▪ HTML CSS | ▪ JavaScript | ▪ Bootstrap | ▪ MySql |
| ▪ Tailwind CSS | ▪ AWS | | |

SOFT SKILL

- | | | |
|---------------------------------|---------------------------|----------------------|
| ▪ Strong Problem-Solving Skills | ▪ Effective Communication | ▪ Team Collaboration |
|---------------------------------|---------------------------|----------------------|

PROJECTS

AI-Driven Resource Allocation & Predictive Project Intelligence Platform

2025

- Developed an AI-driven project intelligence platform using predictive analytics, operations research, and ML models (LSTM, Prophet, XGBoost) to forecast delays, budget risks, and workload issues.
- Built a smart resource optimization engine with OR-Tools and Deep Reinforcement Learning to automate developer/tester allocation and boost productivity. (HIPAA-compliant messaging, caregiver
- Created simulation dashboards featuring adaptive Gantt charts, risk heatmaps, and real-time “what-if” scenario modeling for better decision-making.
- Implemented advanced team analytics, including skill-gap detection, burnout prediction, communication insights, and NLP-based meeting summaries.
- Delivered a scalable full-stack system using Django REST Framework, React.js, PostgreSQL/TimescaleDB, WebSockets, Docker, and cloud deployment with secure RBAC access.

EGADGETS - E commerce Application

2024

- Digital Marketplace: Built a seamless platform for showcasing and selling gadgets, enabling efficient product discovery and customer engagement
- Smart Retail: Integrated advanced features like personalized recommendations and secure payment gateways to enhance the shopping experience

Banking and ATM Simulation System

- Developed a secure banking and ATM simulation system using Django and SQLite.
- Designed a modern Bootstrap UI for a responsive and user-friendly experience.
- Implemented account management features – balance inquiry, deposits, withdrawals, and international transaction.
- Added international transactions with currency conversion and transaction fee handling.
- Built an ATM module supporting PIN validation, cash withdrawal in note denominations, and deposits.
- Created an admin/staff dashboard to manage customer profiles and monitor transactions.

Secure Boating System

2023 - 2024

A system designed to enhance safety and compliance in boating operations.

- Centralized management of boat owners, licenses, insurance, and passenger details.
- Integrated real-time tracking, travel schedule monitoring, and life jacket detection via image processing

CERTIFICATES

- Python Developer Expert (National Council for Technology and Training)
- Certified Cyber Security Analyst (CCSA)
- Artificial Intelligence (AI)
